AWS DevSecOps Architect | Kubernetes Platform Engineering | Terraform | CI/CD | Cloud Security

Kubernetes Platform and DevSecOps Architect with 14+ years of experience designing secure, scalable cloud ecosystems. Expert in orchestrating enterprise-grade Kubernetes clusters (EKS, AKS), automating CI/CD (GitHub Actions/Jenkins) with *GitOps principles* (ArgoCD), and embedding security-first principles into enterprise pipelines. Proven track record of reducing deployment latency by 75% and leading cloud modernization initiatives for Fortune 500 banking and tech clients.

Technical Skills

Cloud & Platform Engineering: AWS (EKS, ECS, EC2, IAM, S3, RDS, VPC, ELB, AutoScaling, CloudFront, Route53), Azure (AKS), Kubernetes, Helm, Kustomize, Terraform, Terragrunt (IaC), ArgoCD (GitOps).

DevSecOps & Security: GitHub Actions, Jenkins, Shift-Left Security, tfSec, Checkov, Fortify, SonarQube (SAST), Snyk, Wiz, Contrast Security (DAST), AWS Security Hub, GitHub Advanced Security.

Scripting & Observability: Python (Operational Automation), Shell Scripting, Markdown, Prometheus, Grafana.

Core Competencies: Secure-SDLC, Threat Modeling, Compliance-as-Code, FinOps (Cost Optimization), ITSM, Agile Scrum, Stakeholder Management.

Professional Experience

 **Mphasis** | Cloud DevSecOps Architect | Bangalore. Jan 2025 - Present

Infrastructure Automation: Reduced infrastructure provisioning time by using custom scripts, eliminating manual processes for resource creation.

Event-Driven Operations: Designed and deployed Python-based AWS Lambda functions to trigger automated, event-driven operations for cost savings.

Security & Compliance: Working on Java version upgrades and vulnerability remediation by leveraging Large Language Models (AI LLMs) to accelerate code refactoring and ensure alignment with enterprise security standards.

 **IBM** | DevSecOps Automation Engineer | Bangalore. May 2022 - Dec 2024

CI/CD Optimization: Migrated Application and Infrastructure CI/CD pipeline from Jenkins to **GitHub Actions** and developed reusable workflows that reduced build times from 20 minutes to 3-5 minutes by implementing caching, parallel builds and Implemented approval gates for production deployments. Which were subsequently adopted by other teams organization-wide.

Kubernetes Platform Engineering: Streamlined EKS Cluster operations using Terraform for provisioning clusters and managing add-on version upgrades, ensuring minimal downtime.

GitOps: Architected and migrated thousands of micro-apps to a fully automated GitOps-driven practice on AWS EKS, using Terraform and ArgoCD for drift-proof, multi-environment deployments.

Shift-Left Security: Engineered a comprehensive DevSecOps posture by embedding Fortify (SAST), Contrast Security (DAST) directly into deployment pipelines, blocking critical vulnerabilities pre-production. Utilized tfsec and Checkov for infrastructure security best practices.

High Availability: Solely managed critical production deployments, ensuring near-zero downtime, high availability, and rapid incident resolution.

Created and maintained Azure Cloud resources using Terraform and Azure DevOps to support complex data analysis workloads.

 **TCS** | Lead Cloud DevOps Architect | Bangalore. Dec 2020 - May 2022

Cloud Migration: Led large-scale application migrations on-premises to AWS EKS using Terraform and Azure DevOps, enforcing secure cloud infrastructure architecture and best practices.

Security Auditing: Conducted comprehensive security audits, successfully remediating critical vulnerabilities while optimizing CI/CD pipeline efficiency for cloud services.

Cloud Architecture: Designed N-Tier Architecture on AWS and Azure cloud infrastructure, resolved L2 and L3 issues, and used Terraform for automation.

Container Orchestration: Successfully migrated legacy applications to containerized environments using EKS, ECS, Docker and Docker Compose.

Pipeline Development: Implemented end-to-end CI/CD pipelines utilizing Jenkins, buddy.works, Git, for multiple web hosting engines.

Virtual Web Hosting: Deployed multiple websites using Apache Web Server and cPanel on AWS Cloud with High availability.

 Lera Technologies | Cloud DevOps Engineer | Hyderabad. Sep 2019 - Apr 2020.

AWS Administration all common cloud services.

Access & Automation: Managed Azure AD integrations, virtualization, and security protocols.

Automated Java and Node-based applications using CI/CD workflows with Git and Jenkins.

Previous Experience (2012 - 2019)

Wonderla | IBM Contracted via **3i Infotech**, **Info Services**, **Kaizen IT Services**

Supported Cloud infrastructure creation to set up cloud-based billing and database servers

Achieved 98% service uptime for billing applications and websites hosted on VMware ESXi, Linux, Database, and Windows ADDC servers.

Administered infrastructure & managed Physical and Virtual Servers.

Handled **network infrastructure, routers, switches, and user management** for Banking and NBFC.

Certifications

 **Certified Kubernetes Administrator (CKA)**

 **IBM DevSecOps Essentials**

 **AWS Certified Solutions Architect - Associate**

 **Microsoft Certified Azure Administrator Associate**

 **Ethical Hacking and Countermeasures Expert**

 **Red Hat Certified Engineer**

Honors & Awards

IBM ~ Awarded *5x Star and 1x Super Star*; received client appreciation for exceptional production deployment and automation.

TCS ~ Achieved **TCS Gems, Contextual Master** Award for sharing Cloud DevOps expertise and driving client project success.

WHL ~ Commended by the VP of IT for successfully implementing infrastructure automation.

3i Infotech ~ Appreciated by the clients for implementing best practices in IT service.

National-Level Gold Medalist in rifle shooting, NCC Thal Sainik Competition Camp, Delhi (2005) and Best Cadet Award.

Education

PGDCA **Gulbarga University** with 62.16% in 2016

Bachelor of Commerce **Gulbarga University** with 69.84% in 2013
